

ALI HAMMADI

Software Engineer

Homs, Syria | hamadea524@gmail.com | +963 937 472 856

PROFESSIONAL SUMMARY

Software Engineer specializing in high-performance mobile application development using Flutter and Django. Proven expertise in implementing Clean Architecture , BLoC/Cubit state management, RESTful API integration, and Firebase/Firestore services. Skilled in delivering scalable, reliable cross-platform and Wear OS applications with clean code standards, strong data modeling, and smooth user experiences.

TECHNICAL SKILLS

- Mobile Development: Flutter, Dart, Cross-Platform Development, Responsive UI , Wear OS Applications
- Backend & Databases: Python, Django, Django REST Framework, RESTful APIs , Firebase Auth, Cloud Firestore, Firebase Realtime Database, Cloud Functions , PostgreSQL, SQLite
- Architecture & State Management: Clean Architecture (Data, Domain, Presentation) , BLoC, Cubit, GetX, Repository Pattern, GetIt, Dependency Injection, JSON Transformation.

PROFESSIONAL EXPERIENCE

- Freelance Flutter Developer

Aug 2024 – Present

- Designed and developed scalable cross-platform mobile applications using Flutter and Dart structured around Clean Architecture principles.
- Architected predictable state management workflows using BLoC and Cubit to ensure high maintainability and clean separation of concerns.
- Integrated Django and Django REST Framework backends, managing complete CRUD operations, dynamic data models, error handling, and network states.
- Implemented Firebase services for authentication, Firestore real-time data sync , cloud messaging, and live communication tools.

- Freelance Flutter Instructor | Homs, Syria

- Instructed students on mobile application architecture, UI implementation, and

state management best practices using Flutter.

- Guided developers through REST API integration, state handling, and hands-on deployment of real-world features.

PROJECTS :

Telmi — Connected Communication & Support Ecosystem :

- Developed a Flutter-based ecosystem (Parent App + Child Wear OS Smartwatch App) supporting children with ASD and speech delays.
- Applied Clean Architecture, BLoC/Cubit, GetIt, and the Repository Pattern.

Tafouki — Educational & Examination Platform :

- Developed a comprehensive mobile platform for schools providing private video lessons, timed MCQ examinations, and student progress tracking.

Afiete — Mental Health & Specialist Platform :

- Built a digital mental health platform connecting users with psychological specialists, appointments, assessments, and digital records.

EDUCATION

Bachelor of Software Engineering ,IT college .

Homs University — Homs, Syria

2021 – Present (Expected Graduation: 2027)

PROFESSIONAL STRENGTHS

- Scalable Software & Application Architecture (Clean Architecture, Layer Separation)
- Advanced State Management (BLoC / Cubit /GetX)
- Full-Stack Mobile Integration (Flutter + Django REST APIs + PostgreSQL)
- Real-Time Systems & Communication (WebRTC, Firebase, Live Tracking)
- Technical Problem Solving, Code Maintainability, and Mentorship
